

dive into **PROCHARGE**

BY MICHAEL NARDY

what is **PROCHARGE**

ProCharge is a billing suite that began in 2008 as the ProCharge Plugin. Since then, it has grown to support many features popular in the most widely-used gateways but is a product that has been offered free to our entire user-base.

ACH

Banking info can be loaded on the Virtual Terminal for charging. Will be able to support alternative method of processing to offer cash discounts for ACH.

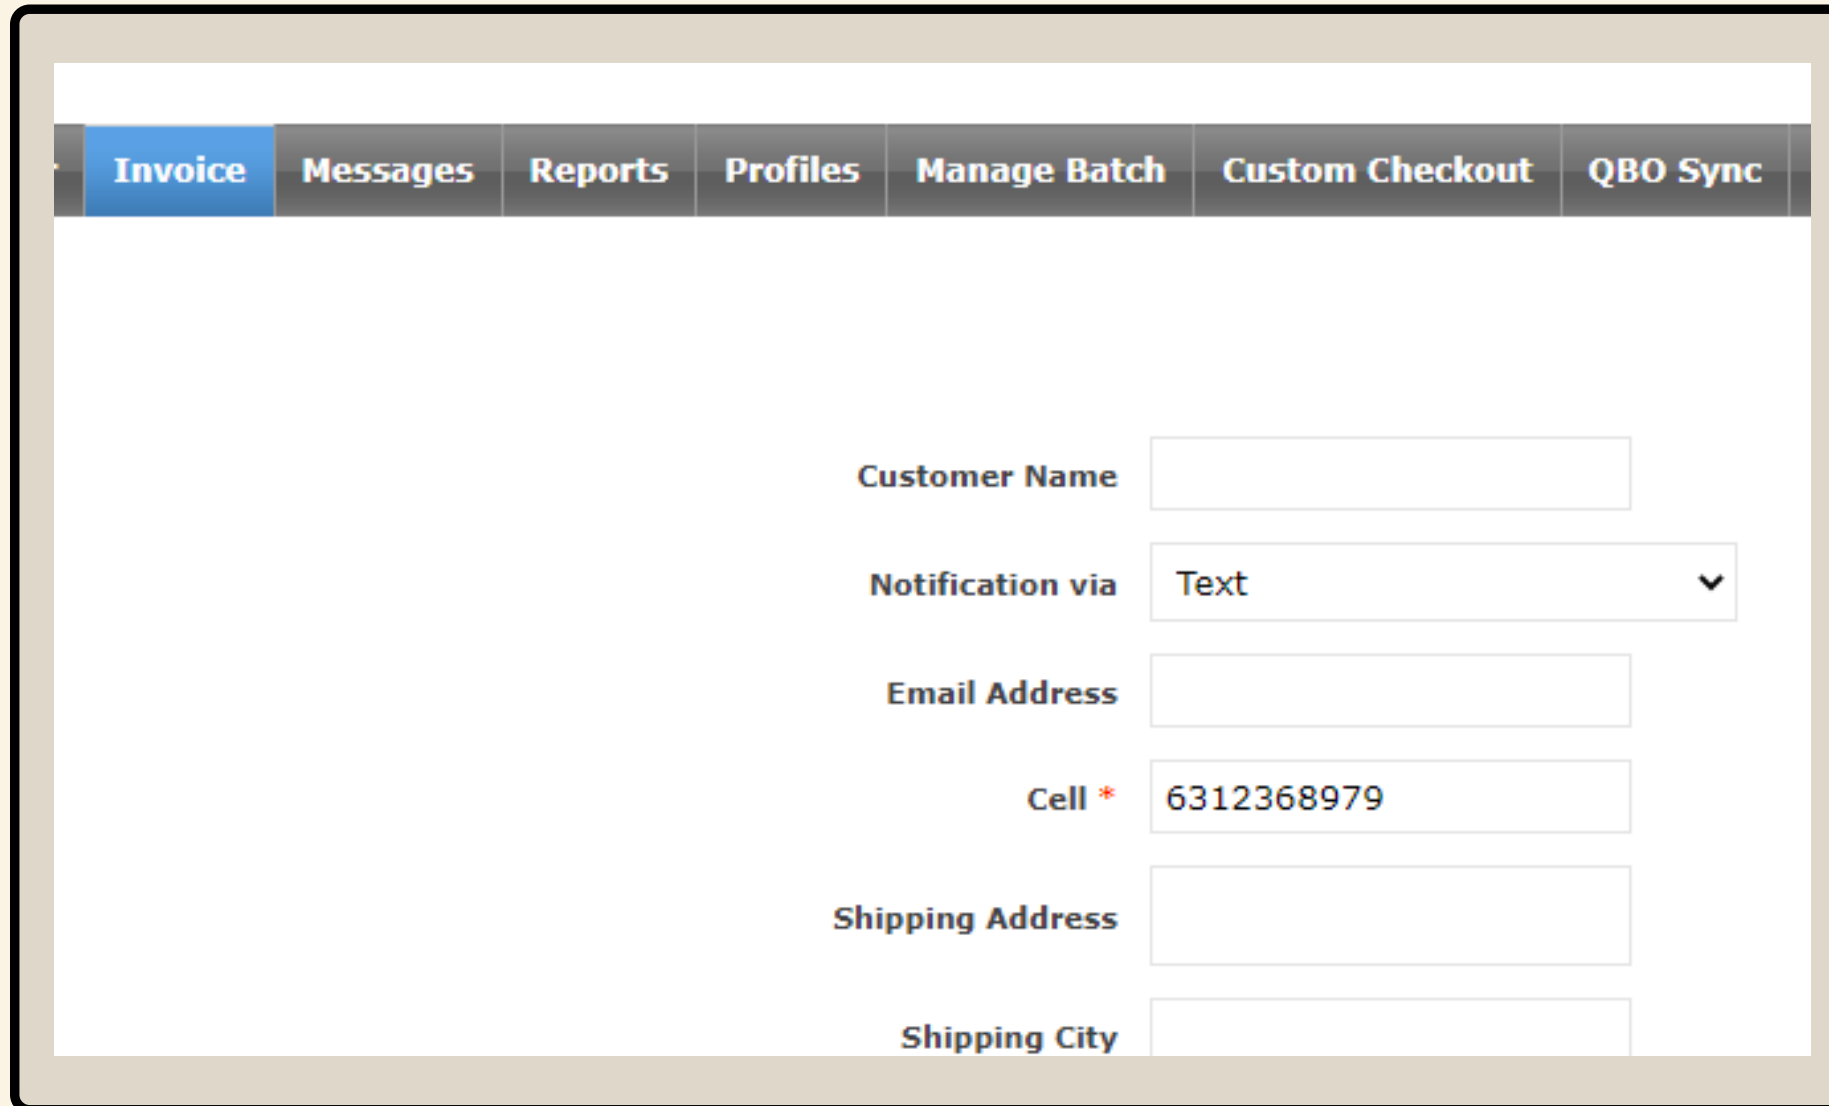

DUAL MERCHANTS

Did you know ProCharge supports multi-MID?

This feature is great for multiple businesses under one roof and also attorney trust accounts (IOLTA).

PROCHARGE

The screenshot shows the 'Invoice' tab selected in a navigation bar. Below the navigation bar, there are several form fields for customer information:

- Customer Name**: A text input field.
- Notification via**: A dropdown menu with 'Text' selected.
- Email Address**: A text input field.
- Cell ***: A text input field containing the number '6312368979'.
- Shipping Address**: A text input field.
- Shipping City**: A text input field.

TEXT2PAY

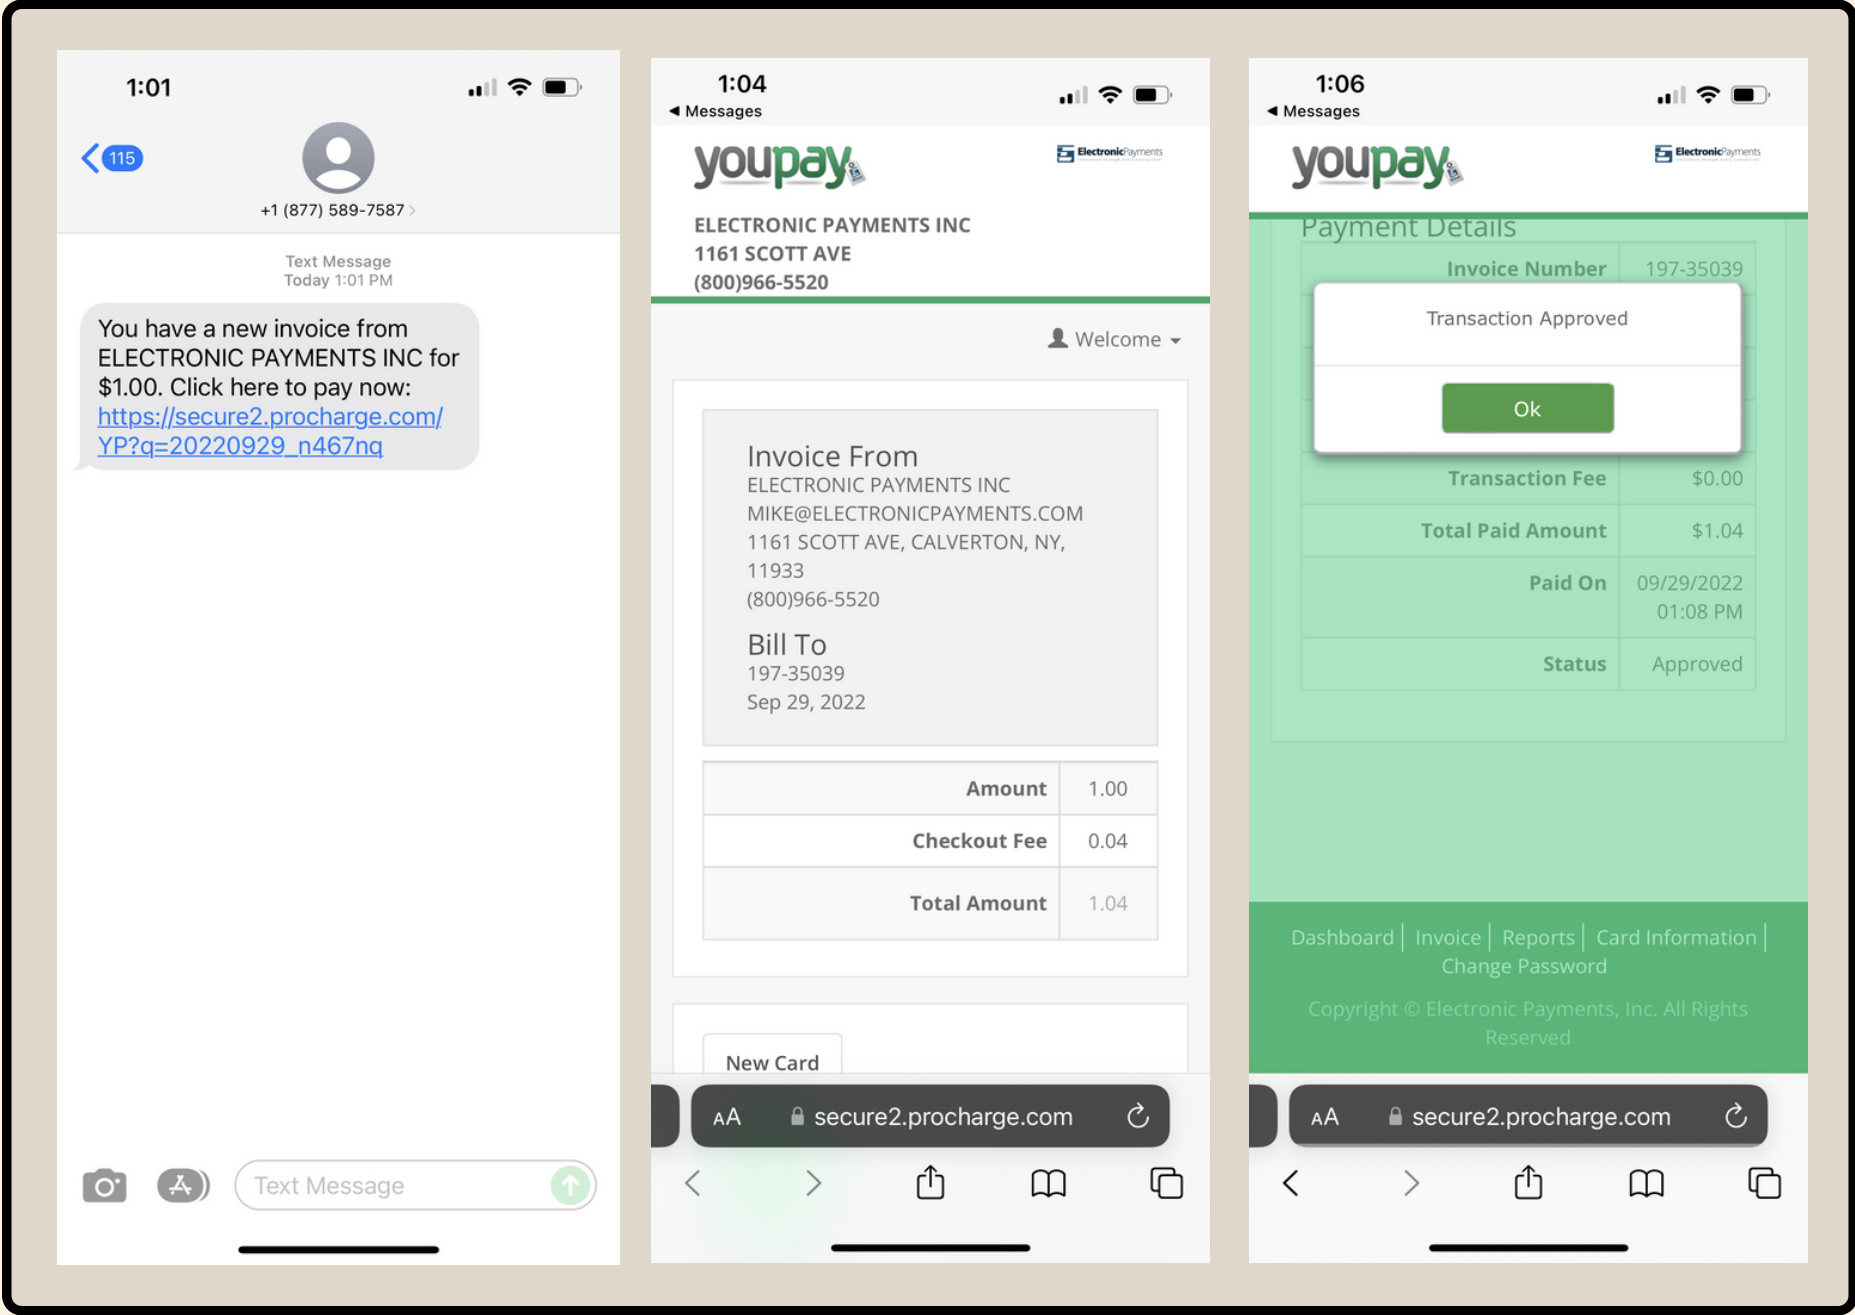

Did you know ProCharge supports Text2Pay?

Easily choose to Text, Email or Text + Email an invoice to a customer.
Supports the Admin Fee model as well.
Will support ACH in the future.

www.procharge.com

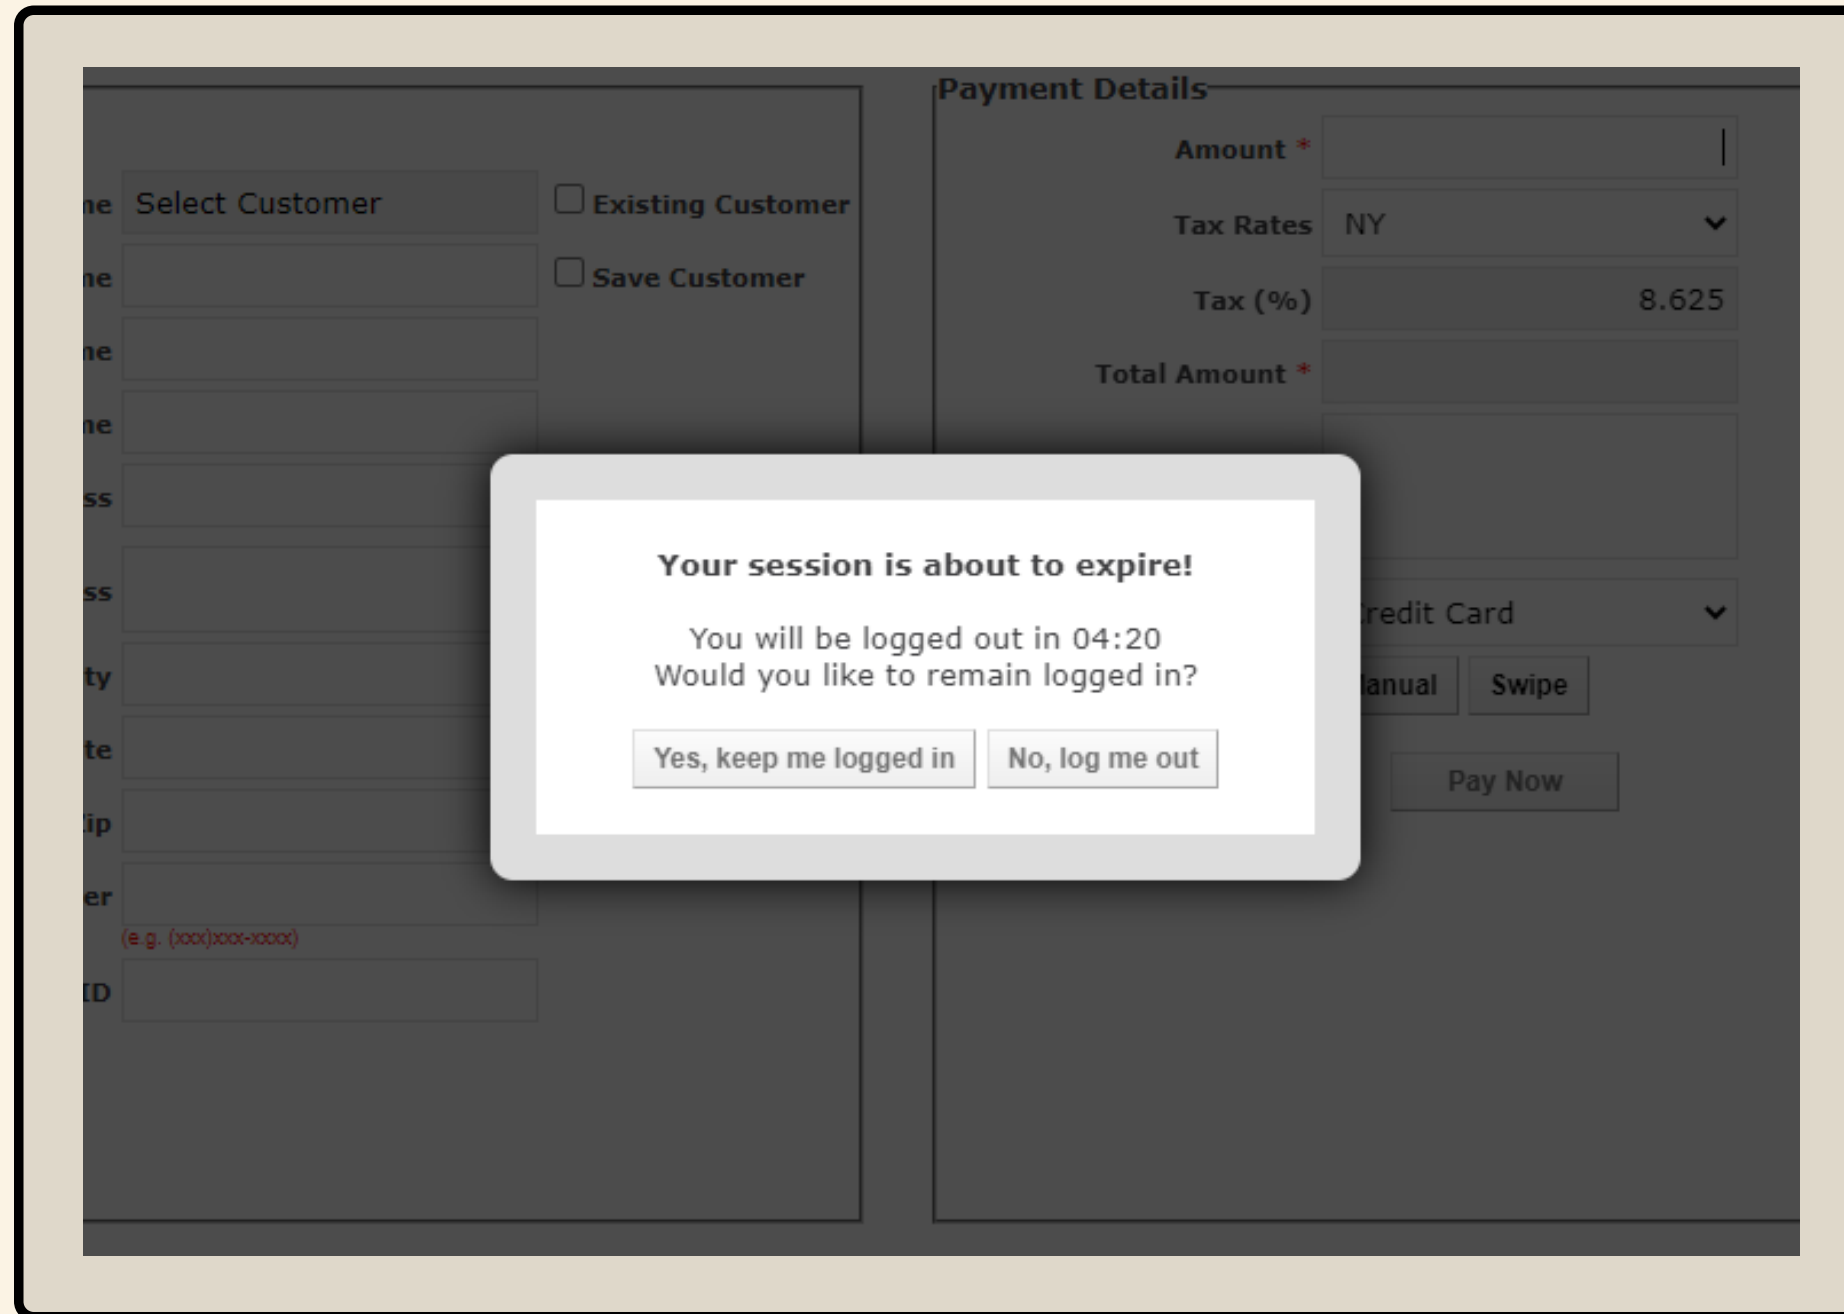

PROCHARGE

TEXT2PAY

Text invoice comes into the customer's cell phone. They click the link and pay. Can even scan their card (for embossed cards)!

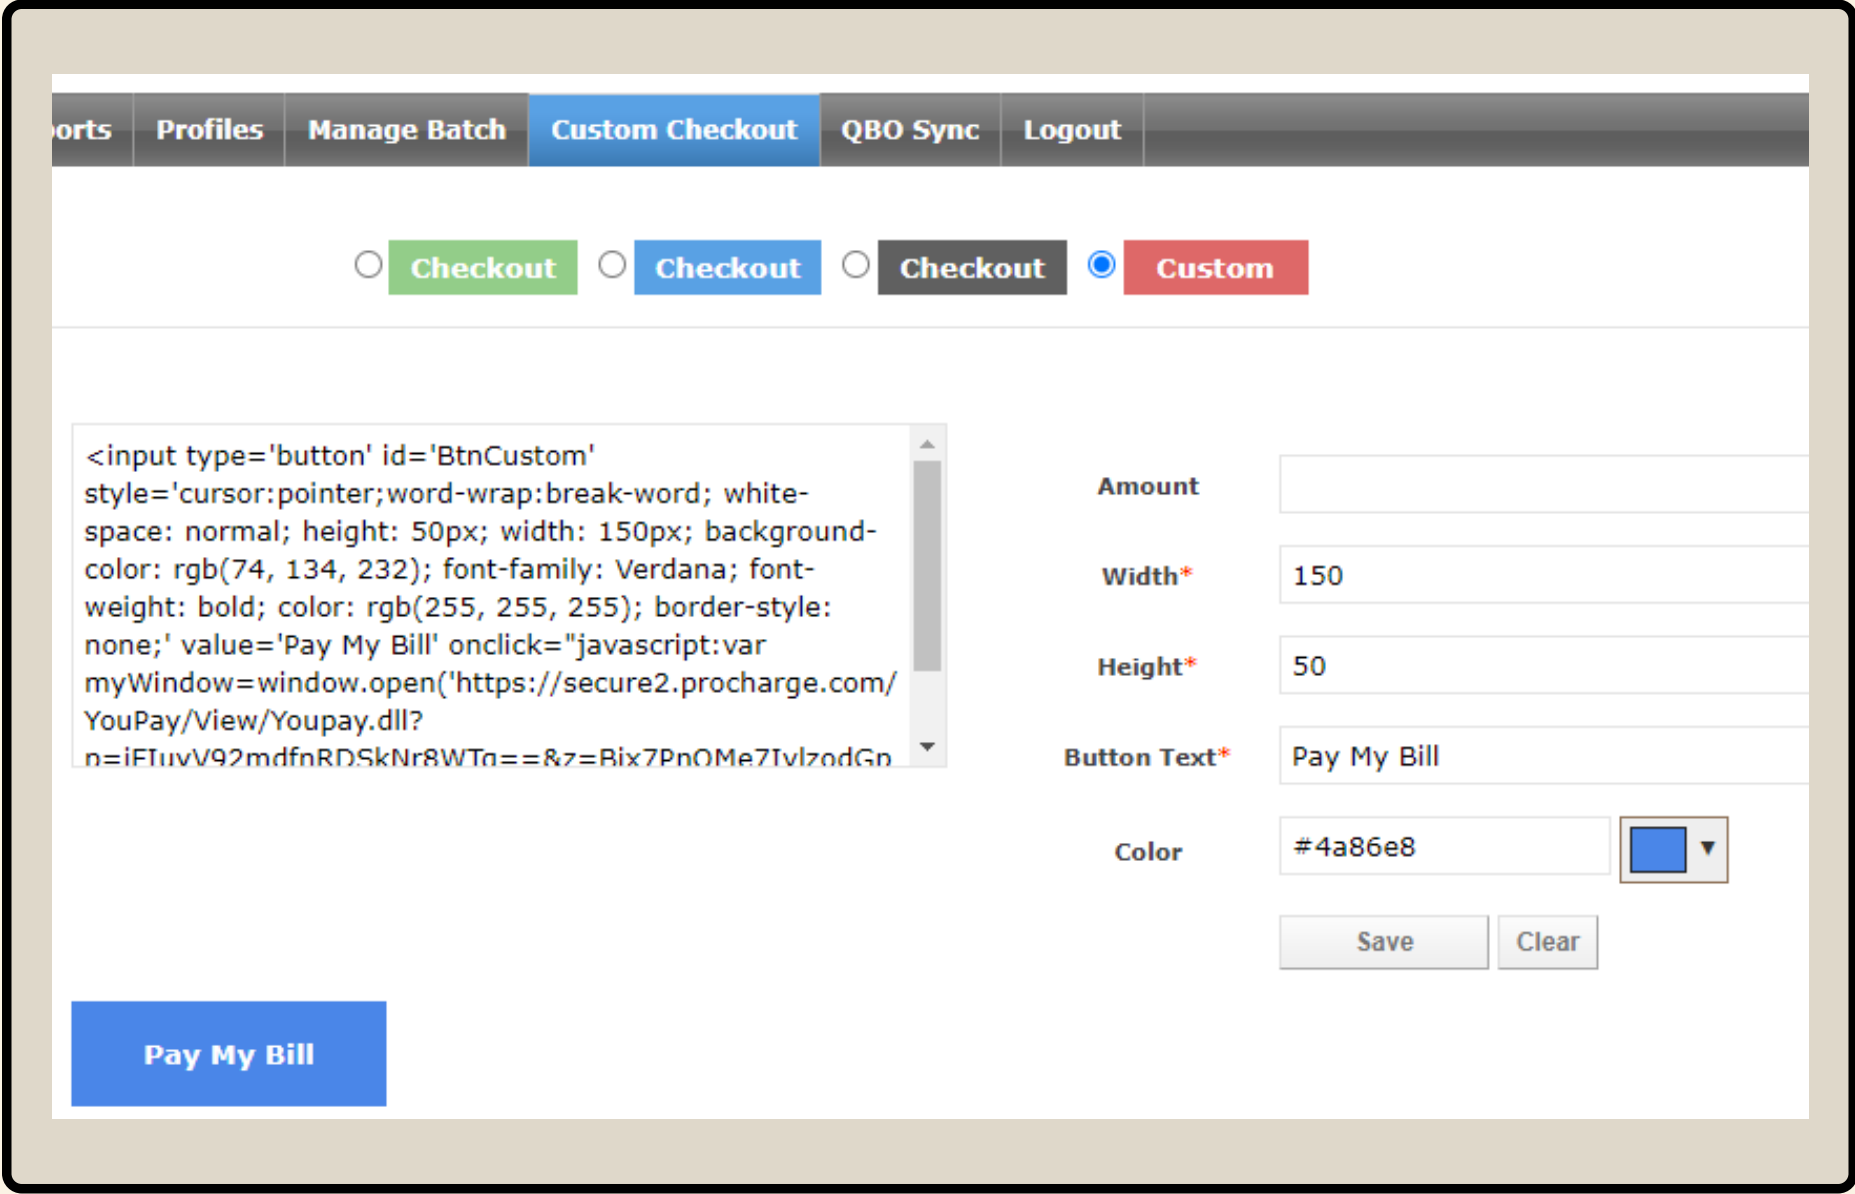

SESSION TIMEOUT

Did you know ProCharge supports extended sessions so users are not timed out?

You can prevent auto-logout automatically by just pressing "Yes, keep me signed in."

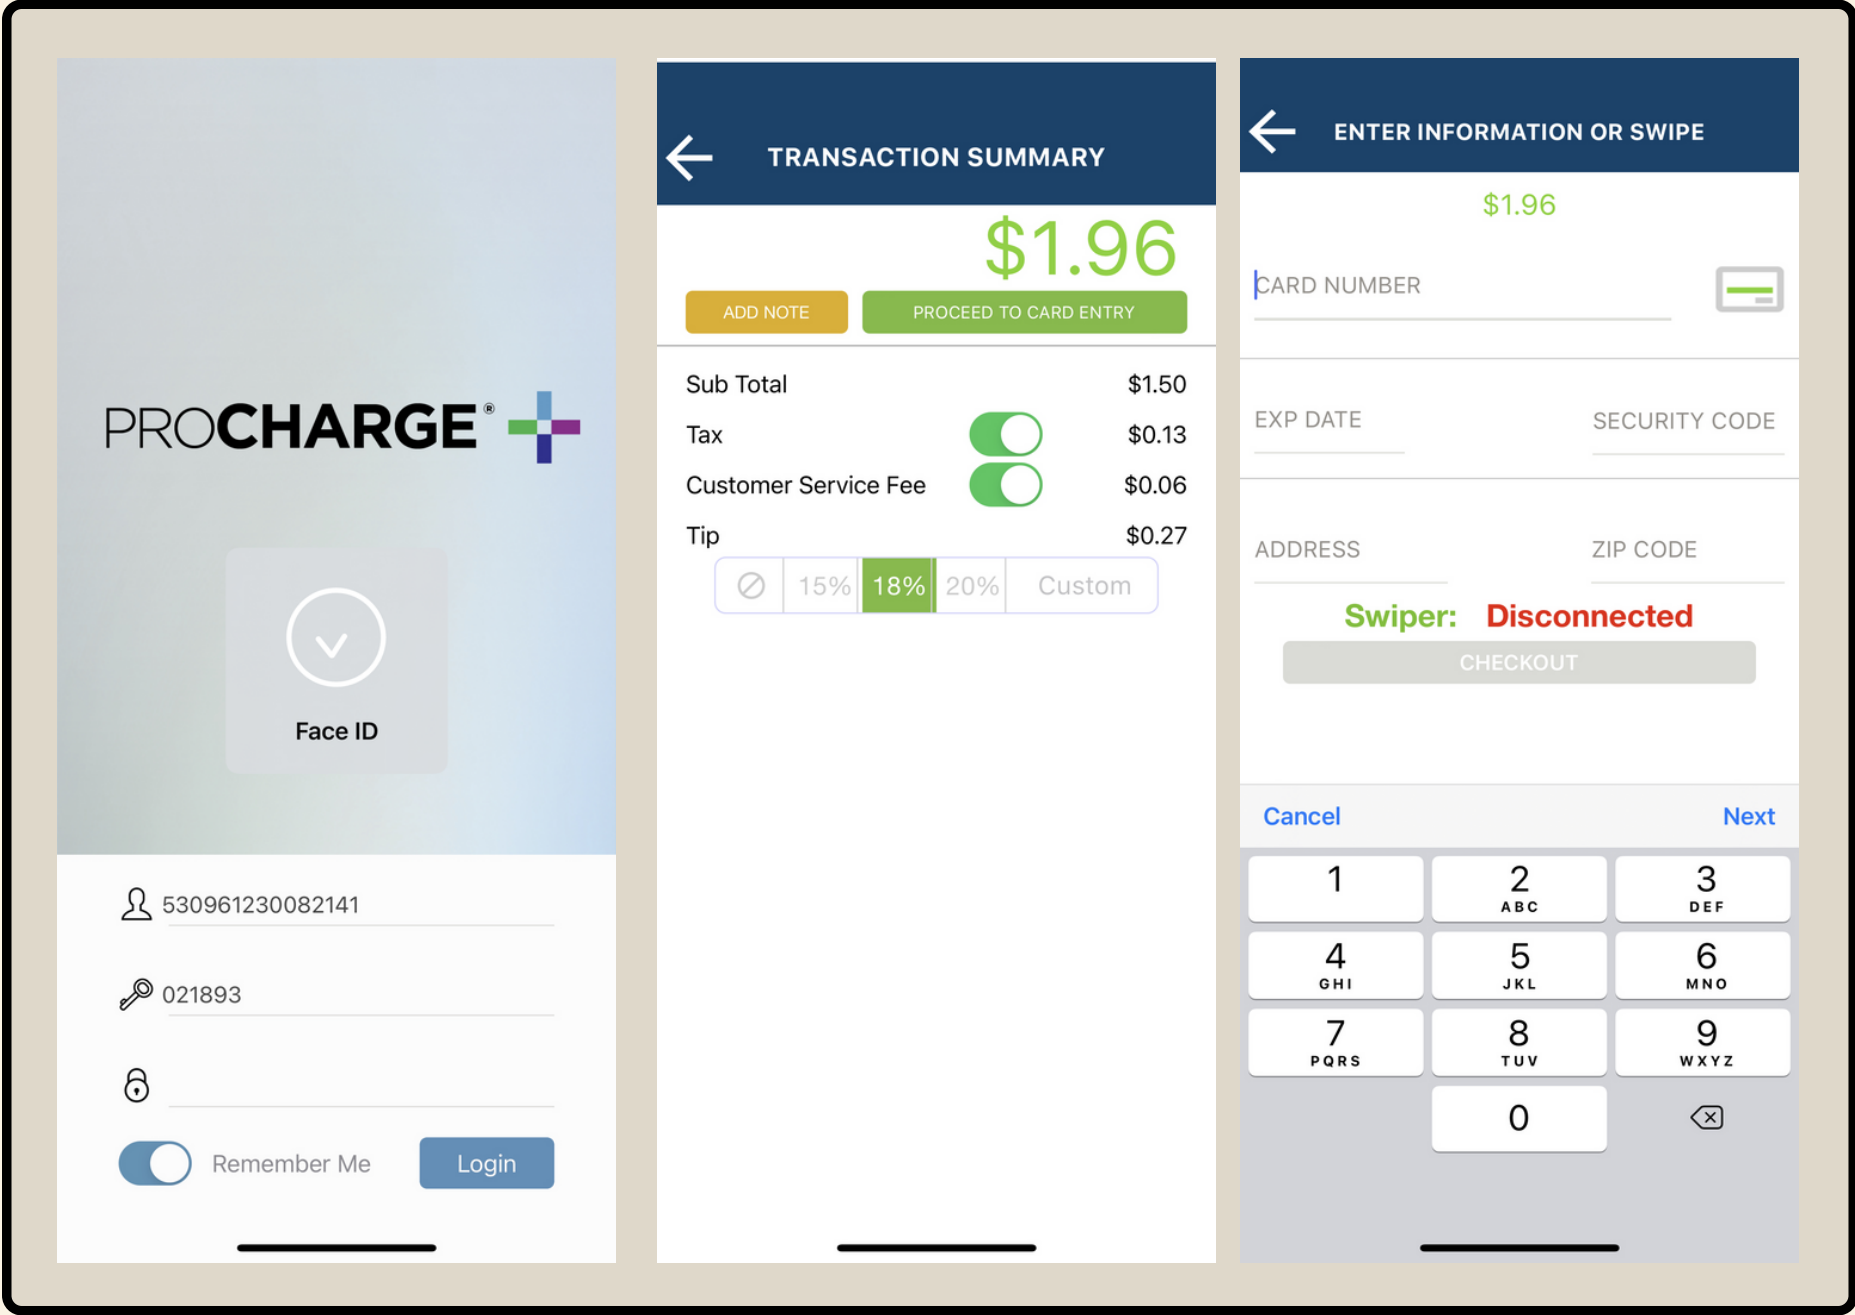

PAYMENT BUTTONS

Did you know ProCharge supports payment buttons for websites and invoices?

PROCHARGE

MOBILE

The ProCharge mobile app is a workhorse and supports inventory, tax rates, cash discount and FaceID to login!
